

# COLLAPSIBLE GATES - RESIDENTIAL & COMMERCIAL

These beautiful, Collapsible Lattice Security Gates can be supplied in galvanised or non-galvanised steel and are manufactured and powder coated in the UK. They come in white as standard, but can be supplied in a wide selection of colours. The gates are usually made to order and ready for installation within a week.

Our Collapsible Lattice Security Gates are manufactured from steel pickets and constructed from 16mm x 10mm x 3mm channel section making these the thickest gate sections on the market.

This is an extremely versatile security product providing solid protection when closed and remaining unobtrusive when open. The open bunch width takes up approximately 15% of the overall opening width and lift up or lift out bottom tracks are available at additional cost, as are a choice of locks.
