

INDUSTRIAL PRODUCTS WAREHOUSING & DOCK LOADING EQUIPMENT

As you will see from the picture on the right, to compliment our range of Doors & Shutters, we also provide a comprehensive range of Industrial, Safety/Protection and Dock Loading Equipment including Retractable Dock Shelters, Dock Bumpers, Electro- Hydraulic Dock Levellers, Alignment curbs and Bollards.

Dock Shelters (Right)

Made to finish at dock height or continued to floor level, our Rigid or Retractable or Inflatable Dock Shelters provide an effective wide seal on a wider range of vehicles. They are constructed from heavy duty fabric incorporating Yellow parking guides and contained within an aluminium framework. Optional corner pads are available to provide an increased seal.

Alignment Curbs (Left)

Constructed from 6.3mm thick mild steel tube, our Alignment Curbs/Wheel Guides to assist correct positioning of vehicles and help prevent damage to surrounding equipment. They are available in below ground or above ground installation.

Dock Levellers (Right)

Available with either a Hinged or Telescopic Lip, our Electro-Hydraulic Dock Levellers are fully functional and specifically designed for operations which require very accurate or delicate positioning of the Lip onto the deck of a fully laden vehicle or utilise maximum vehicle storage capacity when loading.

Dock Bumpers (Below)

Dock Bumpers/Fenders to protect the loading bay, equipment and doors are available in both Fixed and Self-Adjusting types.
