# RollSafe868

The UK's PREMIUM Roller Garage Door Controller

## Your Choice - Wired or Wireless Safety Edge?

RollSafe868 is the high quality solution to automate your roller garage door. Its unique design, ease of installation and commissioning help to deliver the optimal roller door solution that is both safe, secure and simple to install.

No longer are magnets required to offset an uneven floor, our unique system can deactivate the safety edge just before it hits the floor preventing any re-opening or the need to install magnets.

## Save time during installation using our plug and play RollSafe868

- No wiring between the controller and wireless safety edge.
- Pre-wired 2 mtrs mains cable with UK plug.
- Plug in controller terminals for motor and accessories.
- Front panel LED diagnostics of power and safety edge.
- Audible diagnostics of motor thermal, safety edge and low battery indicator.
- Optional wired safety edge system using the same controller.

## SMART PHONE TECHNOLOGY - MY HAND

### SMART PHONE TECHNOLOGY - My Hand

The whole house under your control

MY-HAND permits the control all your home's automated systems, including rolling shutters, blinds, awnings, garage doors, gates and lighting.

My Hand acts as an interface between your smart phone, iPad , android device and PC and the device you want to operate. My Hand transmits open/stop/close and timed radio signals to your devices.

Rooms with devices can be allocated a name and transmitters assigned to each device in each room to operate individually or in groups.

### Simple to install and commission.

Simply plug into your broadband router to reveal the IP address, type this into your browser to reveal a world of control from your smart phone, iPad tablet or PC.

## GATE RECEIVER

### TVTRCM868A02 Radio Receiver

Control your gates and sectional garage doors with our compact radio receiver.

Simply connect to your existing gate or door controller and use a spare button from your garage door transmitter to control these too.

Can also be connected to the My Hand system.

Power supply 12/24Vdc

Comfort And ADDITIONAL Security Options

## Lighting

Compliment your garage door with LED lighting. Designed to fit discretely as a down light, these attractive LED lights give out a massive 14.4watts of white light casting a shower of light over your door.

Lights can be set to turn on and off automatically when your door operates and separate from the door using a spare button on your transmitter.

## Alarm

For additional security the garage door controller can be fitted with a plug in alarm and battery powered door alarm sensor. The door alarm sensor will detect any attempt to break in to the garage and activate the 90dB plug in alarm on the control board.

An additional plug in alarm can be used inside the house duplicating the garage door alarm at 90dB. This can be deactivated so as not to sound and turned on and off remotely by transmitter. Activation can also be cancelled by pressing the red button on the alarm.

### TUBULAR MOTORS

Elero tubular motors are used widely all over the world. The German based manufacturer remains one of the largest manufacturers of tubular motors with a 5 year warranty. Nrg tubular motors are commonly found in most roller garage doors. With a 5 year warranty, the motor has gained an enviable reputation for quality and reliability.
